

# Winnisquam Wood Products Waiver Form

---

Laminate Waiver (*Solid Colors, 01 and 77 finish*)

- Dark solid colors tend to show more wear. Although dark solids are more dramatic and add contrast, there is no guarantee the color will be perfect. Solids always show scratches and wear immediately.
- Gloss finish is not appropriate for high traffic areas. As this scratches easily, it usually arrives at WWP scratched, and fingerprints etc., are highly visible.
- Honed finish has a slight raised bump and can chip easily. It is our opinion based on years of manufacturing that these color laminates and finishes are virtually impossible to manufacture without noticeable scratching or defects. Therefore, it is our intention to warn our clients and their customers of the nature of these products prior to ordering. \*\*\* I understand that gloss finishes and dark solids will show scratches and reveal limitations of the substrate. These imperfections are beyond WWP control. No claims or adjustments will be made or accepted.

Bevel Edge Waiver (*The above information also pertains to bevel edge*)

- Light colors will show the black line. These should be avoided or a contrasting bevel color can be chosen.
- Because we do not use bevel sticks, and is a *custom made product*, it is virtually impossible to fabricate perfect.
- Dark colors may show a white line due to the backing of the laminate. You will be able to see the transition from a bevel edge to a flat cap.

Jobsite Waiver

Needed  
with every  
order

Warranty Waiver

Postform Butt Joint Info Sheet (Needed for every job with a butt joint)

I, \_\_\_\_\_ on \_\_\_\_\_ - \_\_\_\_\_ - \_\_\_\_\_ have reviewed the necessary waivers pertaining to my order, and understand their specific meaning. Therefore, I release WWP of all responsibility as a result of my signature below.

I also agree that no claims to defect may be made after installation. Installation is considered fully accepting the order.
